

6th Annual EarthSat Conference for Weather Analysts

October 17 - 19, 2007

MGM Grand Hotel

Las Vegas, NV

You are cordially invited to MDA EarthSat Weather's 6th Annual EarthSat Conference for Weather Analysts to be October 17-19, 2007 once again in Las Vegas, NV. Our conference will focus on the science and how it applies to energy weather.

Our conference speakers will cover a wide range of weather-related issues that impact the energy markets. Conference attendees have extensive opportunities to exchange ideas, build relationships and discuss perspectives and strategies addressing critical issues with other analysts, traders, and meteorologists in the energy industry.

As with our past conferences, our conference agenda will include presentations with question and answer sessions. To keep things interesting, more casual time is spent with activities such as golf, a CME sponsored cocktail reception at Diego Restaurant, watching the performance of KA by Cirque Du Soleil and a tour of the Atomic Testing Museum. The next page is a preliminary agenda for speakers and activities.

Please scroll down or print this document to view additional details. To register, please complete and fax the registration form attached.

We look forward to seeing you at the 6th Annual EarthSat Conference for Weather Analysts in October. We hope to make this an informative and valuable event for you, your company, and for our industry.
